### INDUSTRY LEADER REPRESENTS STATE OF TEXAS AT SIEMENS NATIONAL CONFERENCE

#### SETS RECORD WITH 10 IMAGING PROJECTS IN DEVELOPMENT

Carrollton, TX — August 2007 — Fry Construction, a specialist in the precision construction of medical imaging facilities, represented the State of Texas as one of 5 companies invited to participate in the annual Siemens Medical Solutions USA, Inc. Contractor's Gold Program Meeting. Fry Construction has been invited and attended the Contractor's Gold Program Round Table discussion every year since its inception in 2003.

Siemens Medical Solutions is one of the world's largest suppliers to the healthcare industry. The company is known for bringing together innovative medical technologies, healthcare information systems, management consulting, and support services, to help customers achieve tangible, sustainable, clinical and financial outcomes. The Contractor's Gold Program conference is an annual event where Siemens management and the invited contractors share best construction practices as well as information concerning new and emerging technologies designed to benefit Siemens customer base. An exclusive group of its preferred contractors are invited annually to participate in this exclusive program. In addition to Fry Construction, only four other companies received invitations, including representatives from across the United States.

Fry Construction has been one of Siemens' preferred contractors for over 15 years. Preferred status is awarded to companies that Siemens believes provide the most accurate and effective overall facility design and construction.

"Siemens is one of the leaders in medical imaging technologies, so being invited to this type of event is both flattering, as well as a unique opportunity for us to get more closely aligned with upcoming technology," stated Ben Fry, President of Fry Construction. He added, "Given the broad presence of Siemens devices, we know this also gives us a big advantage in optimal facility design and construction."

Coincidentally, Fry Construction also has recently reached another milestone, with a total of 10 different medical imaging facilities under construction concurrently across Texas, Oklahoma and New Mexico.

About Fry Construction Company, Inc.  
Fry Construction Company, Inc. is the leader in the precision construction of medical imaging facilities. Fry was a pioneer in the practice of precision construction in 1984, at the University of Texas Health Science Center and has completed nearly 500 specialized facilities over the past two decades.
